Introduction

We are part of the routine of millions of people who use Wyda products every day.

Our products

Our products were created with the mission of being versatile, practical and essential in people's lives.

Sustainability

Actions and awareness-raising to minimize impacts on the environment and contribute to a better world!

Products

Aluminum

- Aluminum foil • Stove protector • Tray
- Dish • Roasting pan • Mini round pans

Plastic

- PVC film • Polyester film • All-purpose bag
- Zip bag • Polyester bag • Gloves

Paper

- Wax paper • Multipurpose Parchment Paper
- “Assalight” • Airfryer Non-stick Paper Lining

Contact us

Talk to our representatives and keep up to date with the latest news

Wyda is the **leading brand in sales** of packaging and wrapping for retailers in Brazil.

OUR IMPACT

How **Wyda** impacts other lives

We are part of the routine of millions of people who use Wyda products every day in their homes and businesses. Our solutions are built on responsibility, respect and safety.

A **proud** history

Our products were created with the mission of being **versatile, practical and essential** in people's lives.

The Wyda product line is present throughout the country and in several countries abroad, since its operational infrastructure and production and distribution logistics ensure supply capacity. We are the first aluminum disposable packaging company to be ISO 9001 certified. The Quality Certification consolidates the brand's differential, guaranteeing the consumer a system that is reliable at all stages and prepared to meet the globalized market and its demands. Before it reached your hands, long journeys were conquered:

1992

**HERE BEGINS
OUR JOURNEY**

Founding of Wyda in the
city of Sorocaba – São Paulo – Brazil

TIMELINE

2019

The group starts operations in **Asunción - Paraguay**, with the aim to improve its service to Latin America.

2008

Expansion in **Três Lagoas, Mato Grosso do Sul - Brazil**, strategically located to meet the needs of the Midwest.

2020

New distribution center to increase storage capacity at the Sorocaba/SP unit.

2017

It crossed borders and started production in **South Africa**, with a manufacturing plant to meet the demand for specific products from the African continent.

2002

New production unit in **Recife, Pernambuco - Brazil**
Capable of meeting demand in the North and Northeast.

2022

It is now **30 years old** as a **leading brand** in packaging and wrapping sales.

2023

Expansion of the distribution center in São Lourenço da Mata, Pernambuco - Brazil.

2024

New factory in the United States. Furthermore, in response to the high demand in the northern region of Brazil, the company established a distribution center in Manaus, in the state of Amazonas

Constant care for the **environment**

We create aluminum packaging with the same seriousness as those who produce the packaged food. We believe that a more beautiful world is made up of sustainable choices that protect biodiversity and keep nature alive.

For this reason, we work with partners such as “Eu Reciclo”, which helps us fulfill the reverse logistics of our production, making it more sustainable through recycling.

Initiatives like these also contribute to education, developing a positive cycle. When everyone is informed, it is possible to broaden the way we care for nature towards increasingly correct choices.

WYDA IS PRACTICAL, ESSENTIAL AND SUSTAINABLE

alennium

Our products made from low-carbon aluminum have the **"Alennium" Seal** on the packaging, issued by CBA (Brazilian Aluminum Company), which proves our sustainable commitment.

As a 100% recyclable product, aluminum can be reused unlimited times. When metal is recycled, 95% of the energy needed to produce it the first time is saved. In this way, we maintain a careful relationship with the environment, while offering a practical, uncomplicated and eco-friendly product.

— For the consumer

- Resistant to oxidation, increasing the durability of the packaged food;
- It is multi-purpose and the same packaging can be used from preparation to consumption;
- It goes from the freezer to the oven without altering the characteristics of the food;
- It can be used in the microwave or conventional oven, making it very practical.

— For industry and commerce

- Optimized stacking;
- Transportation of large volumes with fewer journeys, resulting in reduced costs and CO2 emissions;
- Large volumes with less storage space.

— For the environment

- It encourages the development of environmental awareness, ensuring responsible behavior towards the environment;
- It is infinitely recyclable and there is less waste, less mineral extraction and less interference with the environment;
- Encourages the recycling of other materials;
- It reduces the volume of waste generated, helping to solve the issue of treating waste resulting from consumption.

Choose **aluminum
packaging** for
your routine ;)

ALUMINUM FOIL

Use to cook, prepare and protect

Traditional – Day to Day
